KloudData

Smart • Agile • Enterprise

2nd May 2019

TO WHOM IT MAY CONCERN

It is my pleasure to write this letter of recommendation for Mr. Aditya Agrawal. I first met Aditya when he joined KloudData Labs Pvt. Ltd. in January 2019 and have been closely working with him since then. He was recruited at the campus placements and was one of the 3 engineering graduates recruited by our Company. He was assigned to my team even before completing the 3 month long mandatory training program of the Company and was juggling between training sessions and work allocated to him very well.

He is a quick learner and has good analytical skills. I have assigned him to 3 different projects successively involving newer technologies based on his ability to learn and grasp new things quickly. He was also involved in very critical projects which required problem solving skills and he has proved himself as a good team player.

His sincerity, hardworking nature and dedication to work at the start of his career truly impressed me. Aditya has displayed good communication skills; both written and verbal in the professional environment. His performance during the appraisal period was very good. He was one of the top performers in his peer group. I observed that he is keen on improving his technical knowledge and understanding, and is constantly working towards it.

I am confident that he will not only excel in his academics but also in his career and strongly recommend him to your institution where he can nurture and apply his talent. Furthermore I wish to see him back at KloudData Labs once he is done with his learnings. I am very interested in Mr. Aditya's application and will be happy to provide any further information, if needed. I wish him "All the Best" in all his future endeavours.

Sincerely,

Mr. Ujwal Ghongade
Senior Software Developer
KloudData Labs Pvt. Ltd.
